Basal Cells in Maintenance and Regeneration of the Nasal Epithelium

Melissa Pynnonen, MD
University of Michigan Medical School
Rhinosinusitis: Variations in Care and Opportunities for Improvement

The Triological Society has announced the funding of five research grants effective August 1, 2012. The five career development grants have been awarded in the amount of \$40,000 each for a period of one to two years. These awards will provide support for the research career development of otolaryngologists-head and neck surgeons who have made a commitment to focus their research endeavors on patient-oriented research such as clinical trials, translational research, outcomes research and health services research.

The Society has awarded more than \$3 million in grant funds since 1994.

For information on the Society's 2013 grant programs go to www.triological.org
